**GEOGRAPHIC CATCHMENT AREAS**

“New Policy”

For Stakeholders Review April – May, 2015

**Scope**

This policy is established to identify the geographical catchment area (boundaries) which a school normally serves, and the process to be followed to make changes to these geographic areas.

**Purpose**

To define the geographic catchment areas schools serve, and to provide a process for making changes.

**Definitions**

School – A public school operated by the Cape Breton-Victoria Regional School Board.

Neighbourhood School – Describes the school in which students in a particular neighbourhood would normally attend.

Geographic Boundary – Describes the geographic boundary or catchment area served by a school operated by the Cape Breton-Victoria Regional School Board.

**Policy Statement**

It is the policy of the Cape Breton-Victoria Regional School Board to maintain geographic boundaries describing the catchment area served by schools under its jurisdiction.

**Cross Reference**

**Authorization**

This policy has been authorized by the Board under motions number……
Responsibility

It is the responsibility of the Director of Operational Services to ensure the policy and its administrative procedure and implementation.

Implementation

The Director of Operational Services or designate will implement the policy and administrative procedures.

Procedures

School geographic areas are described in Appendix A

The following process will be required where boundary changes are suggested. The process will not be necessary where a school or group of schools are consolidated to form a single school fully incorporating the boundaries of the two or more schools; or where boundary changes have been incorporated into the Terms of Reference of a School Option Committee formed under the School Review Policy.

   a) The board will notify the school administration of schools involved of a recommendation for a boundary change outlining the proposed change, and the reason for the change.

   b) The board will place an ad in the local newspapers and publish on School Board and school websites indicating its recommendation to change the catchment area served by the school with a minimum of two weeks’ notice of a public meeting regarding the proposed change.

   c) The board will hold a public meeting in the areas affected to explain the change, and to provide an opportunity for comment.

   d) No less than 30 days after the public meeting, and no more than 90 days after the public meeting the board at a regular school board meeting may change the boundaries by motion.

Associated Forms

Policy Review

This policy will be reviewed by the Director of Operational Services within three years from the authorization date.
