Competitions were held in Carpentry, Workplace Safety, Electrical, and Welding. As well, a Career Showcase was featured with members from industry, skills partners, and various training facilities. The Nova Scotia Skills Competitions allows students the opportunity to showcase their skills and compare what they are doing to other students from around our province. Students from throughout the province competed including Halifax, South Colchester, Dartmouth, and others. Gold medalists have the opportunity to compete at the national competitions which will be held in Toronto, Ontario, in June. The format of the Career Showcase was changed for this year with the goal of having more participation from the students who were in attendance to view the competitions and career showcase. Participants were asked to have interactive displays for students to complete, as well as have group activities that allowed for more participation with the various vendors. This proved to be a worthwhile change, as feedback from students was very positive. Nineteen students from Memorial High competed in the various competitions and a number of medals were achieved. Congratulations to all the students who competed. As well, a big thank you goes to the staff and students who helped in the planning and implementation of the competitions. A great job by all involved. The Board Chair Lorne Green followed with his report. The panel is asking that school boards and schools encourage students, teachers and staff to â€œTake the Surveyâ€• online during school hours on Friday. Parents are being encouraged to go to libraries or CAP sites in their community to participate as well. The panel recognizes it may prove challenging to accommodate everyone at some schools, but are hopeful that schools can find a way to make it happen. The panel has also provided a guide to enable likeminded groups to come together to identify issues and bring them forward to the panel.
